version 3

version 2

version 4

# WHY VERSION CONTROL

# WHY VERSION CONTROL

What is the difference between version i and version j?

# WHY VERSION CONTROL

What is the difference between version i and version j?

I'd like to revert some file to version k.

# WHY VERSION CONTROL

What is the difference between version i and version j?

I'd like to revert some file to version k.

You need a VCS!

# WITH GIT (1/2)

git repository

# WITH GIT (1/2)

add a new version

git repository

# WITH GIT (1/2)

give me version i of file j

git repository

# WITH GIT (2/2)

# PROJECTS USING GIT

- Linux kernel
- Android
- Egit/jgit
- Fedora
- FFmpeg
- gcc
- jQuery
- .....

# OTHER VCS

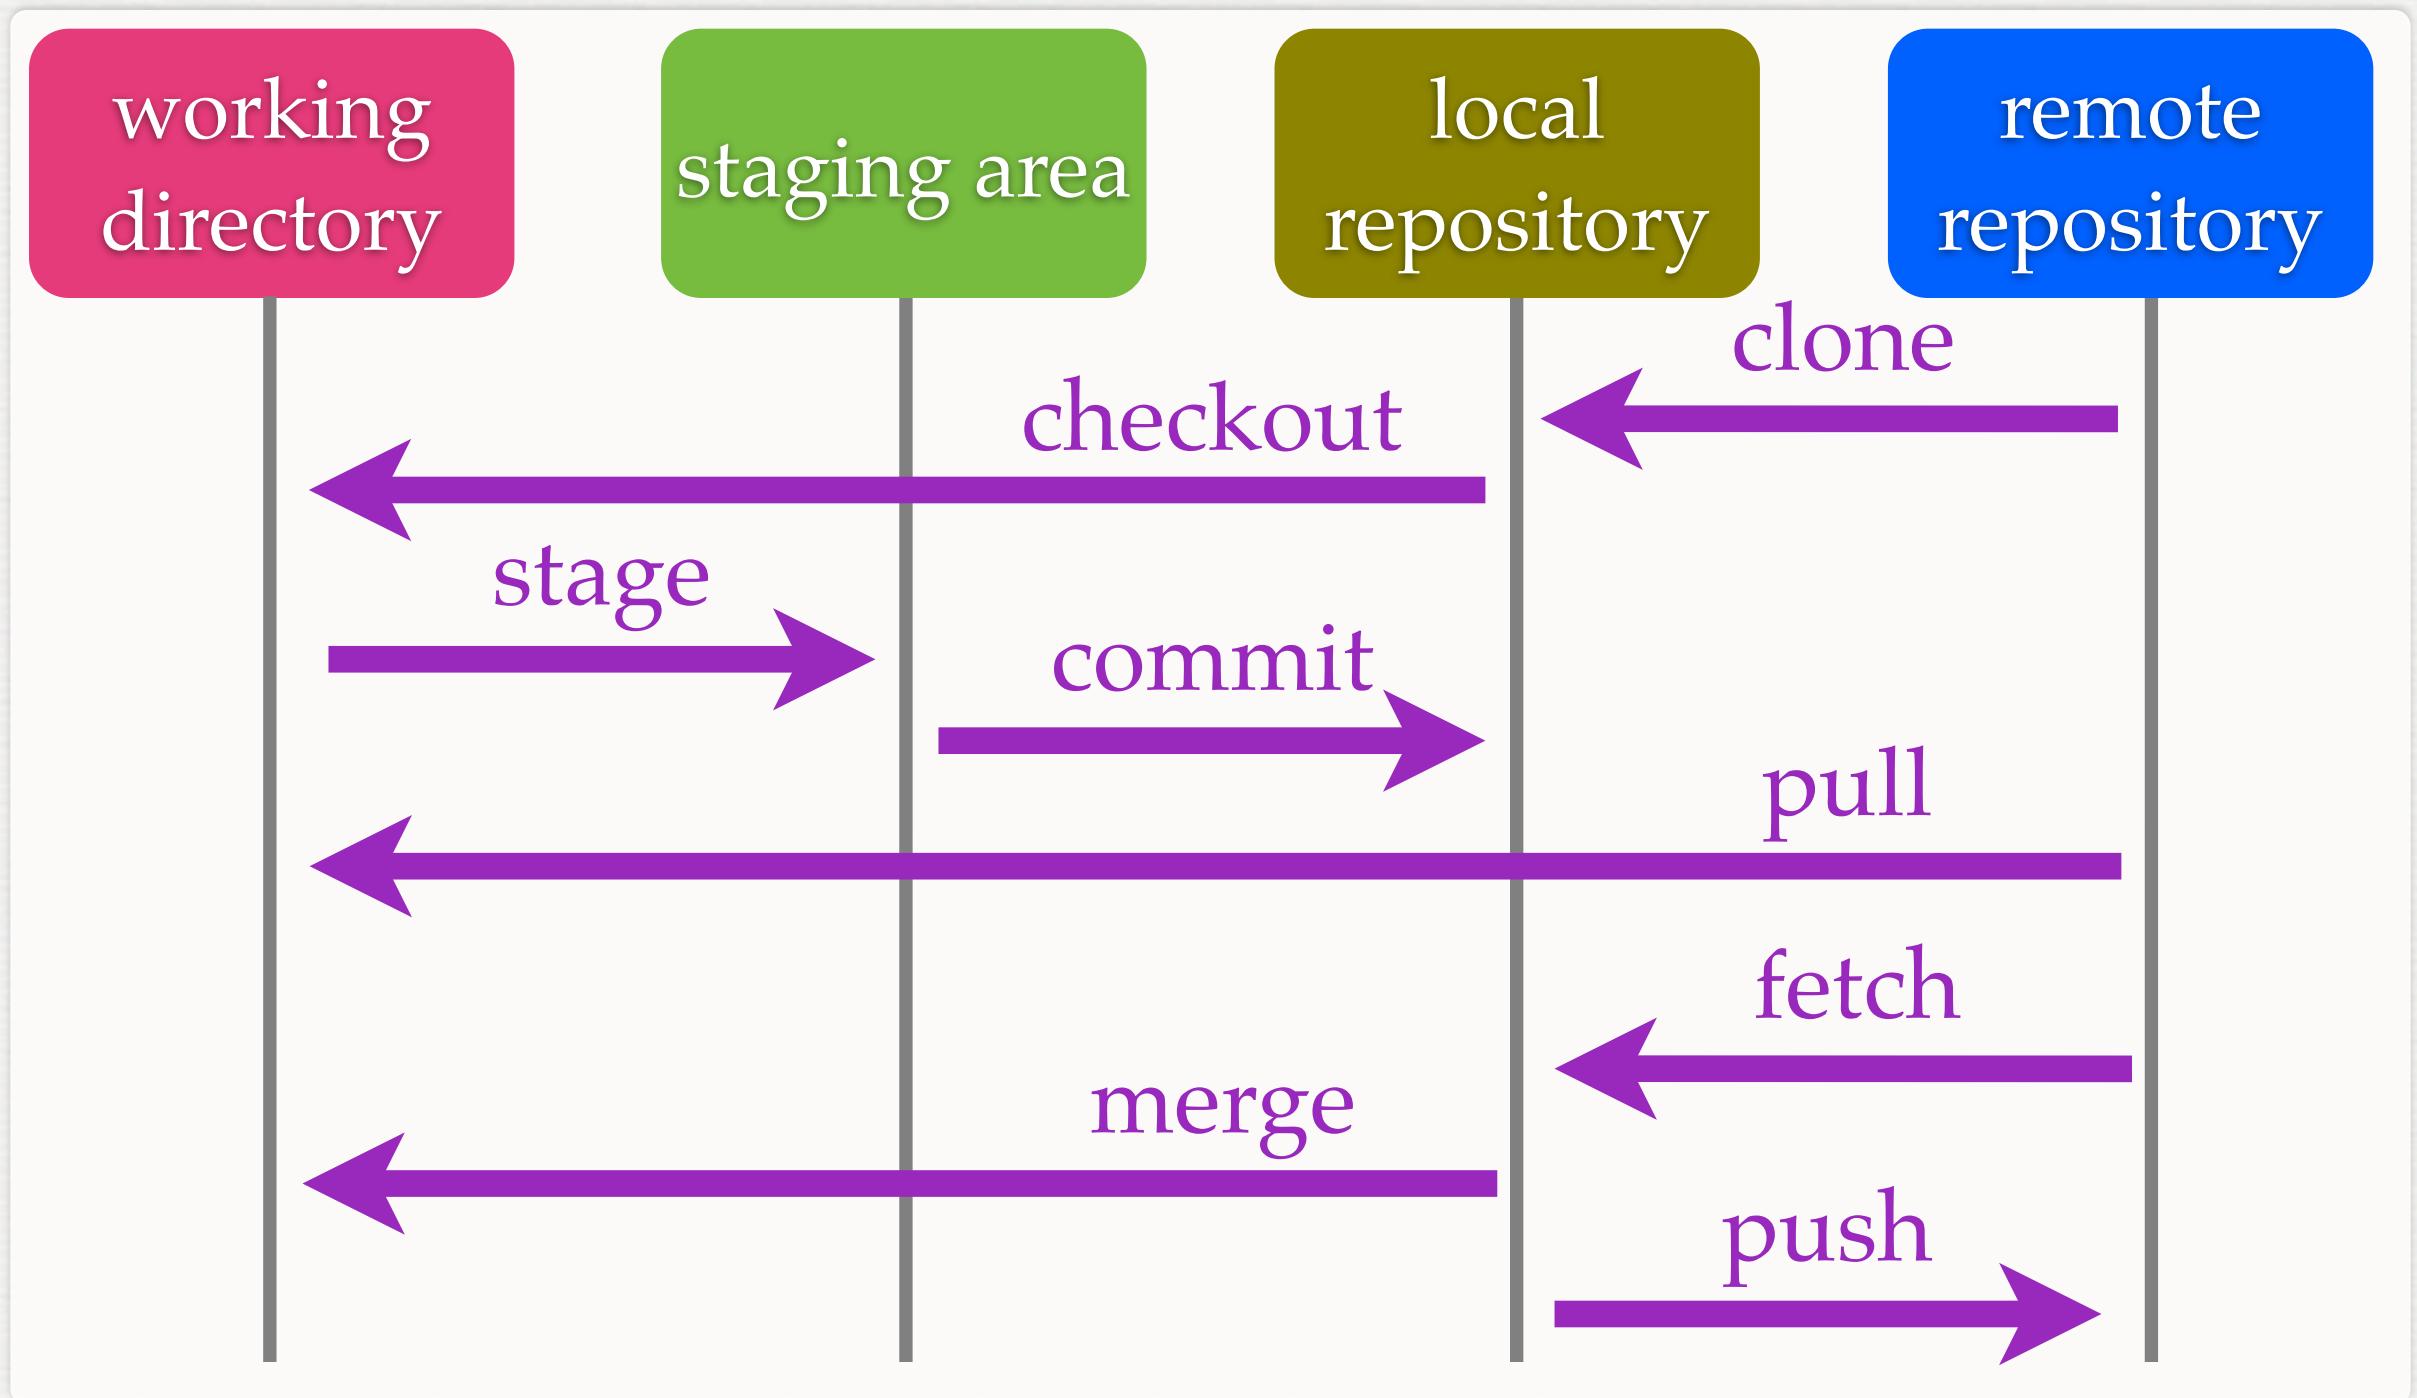

- CVS
- Subversion (SVN)
- Mercurial
- Rational Team Concert
- Visual SourceSafe
- ...

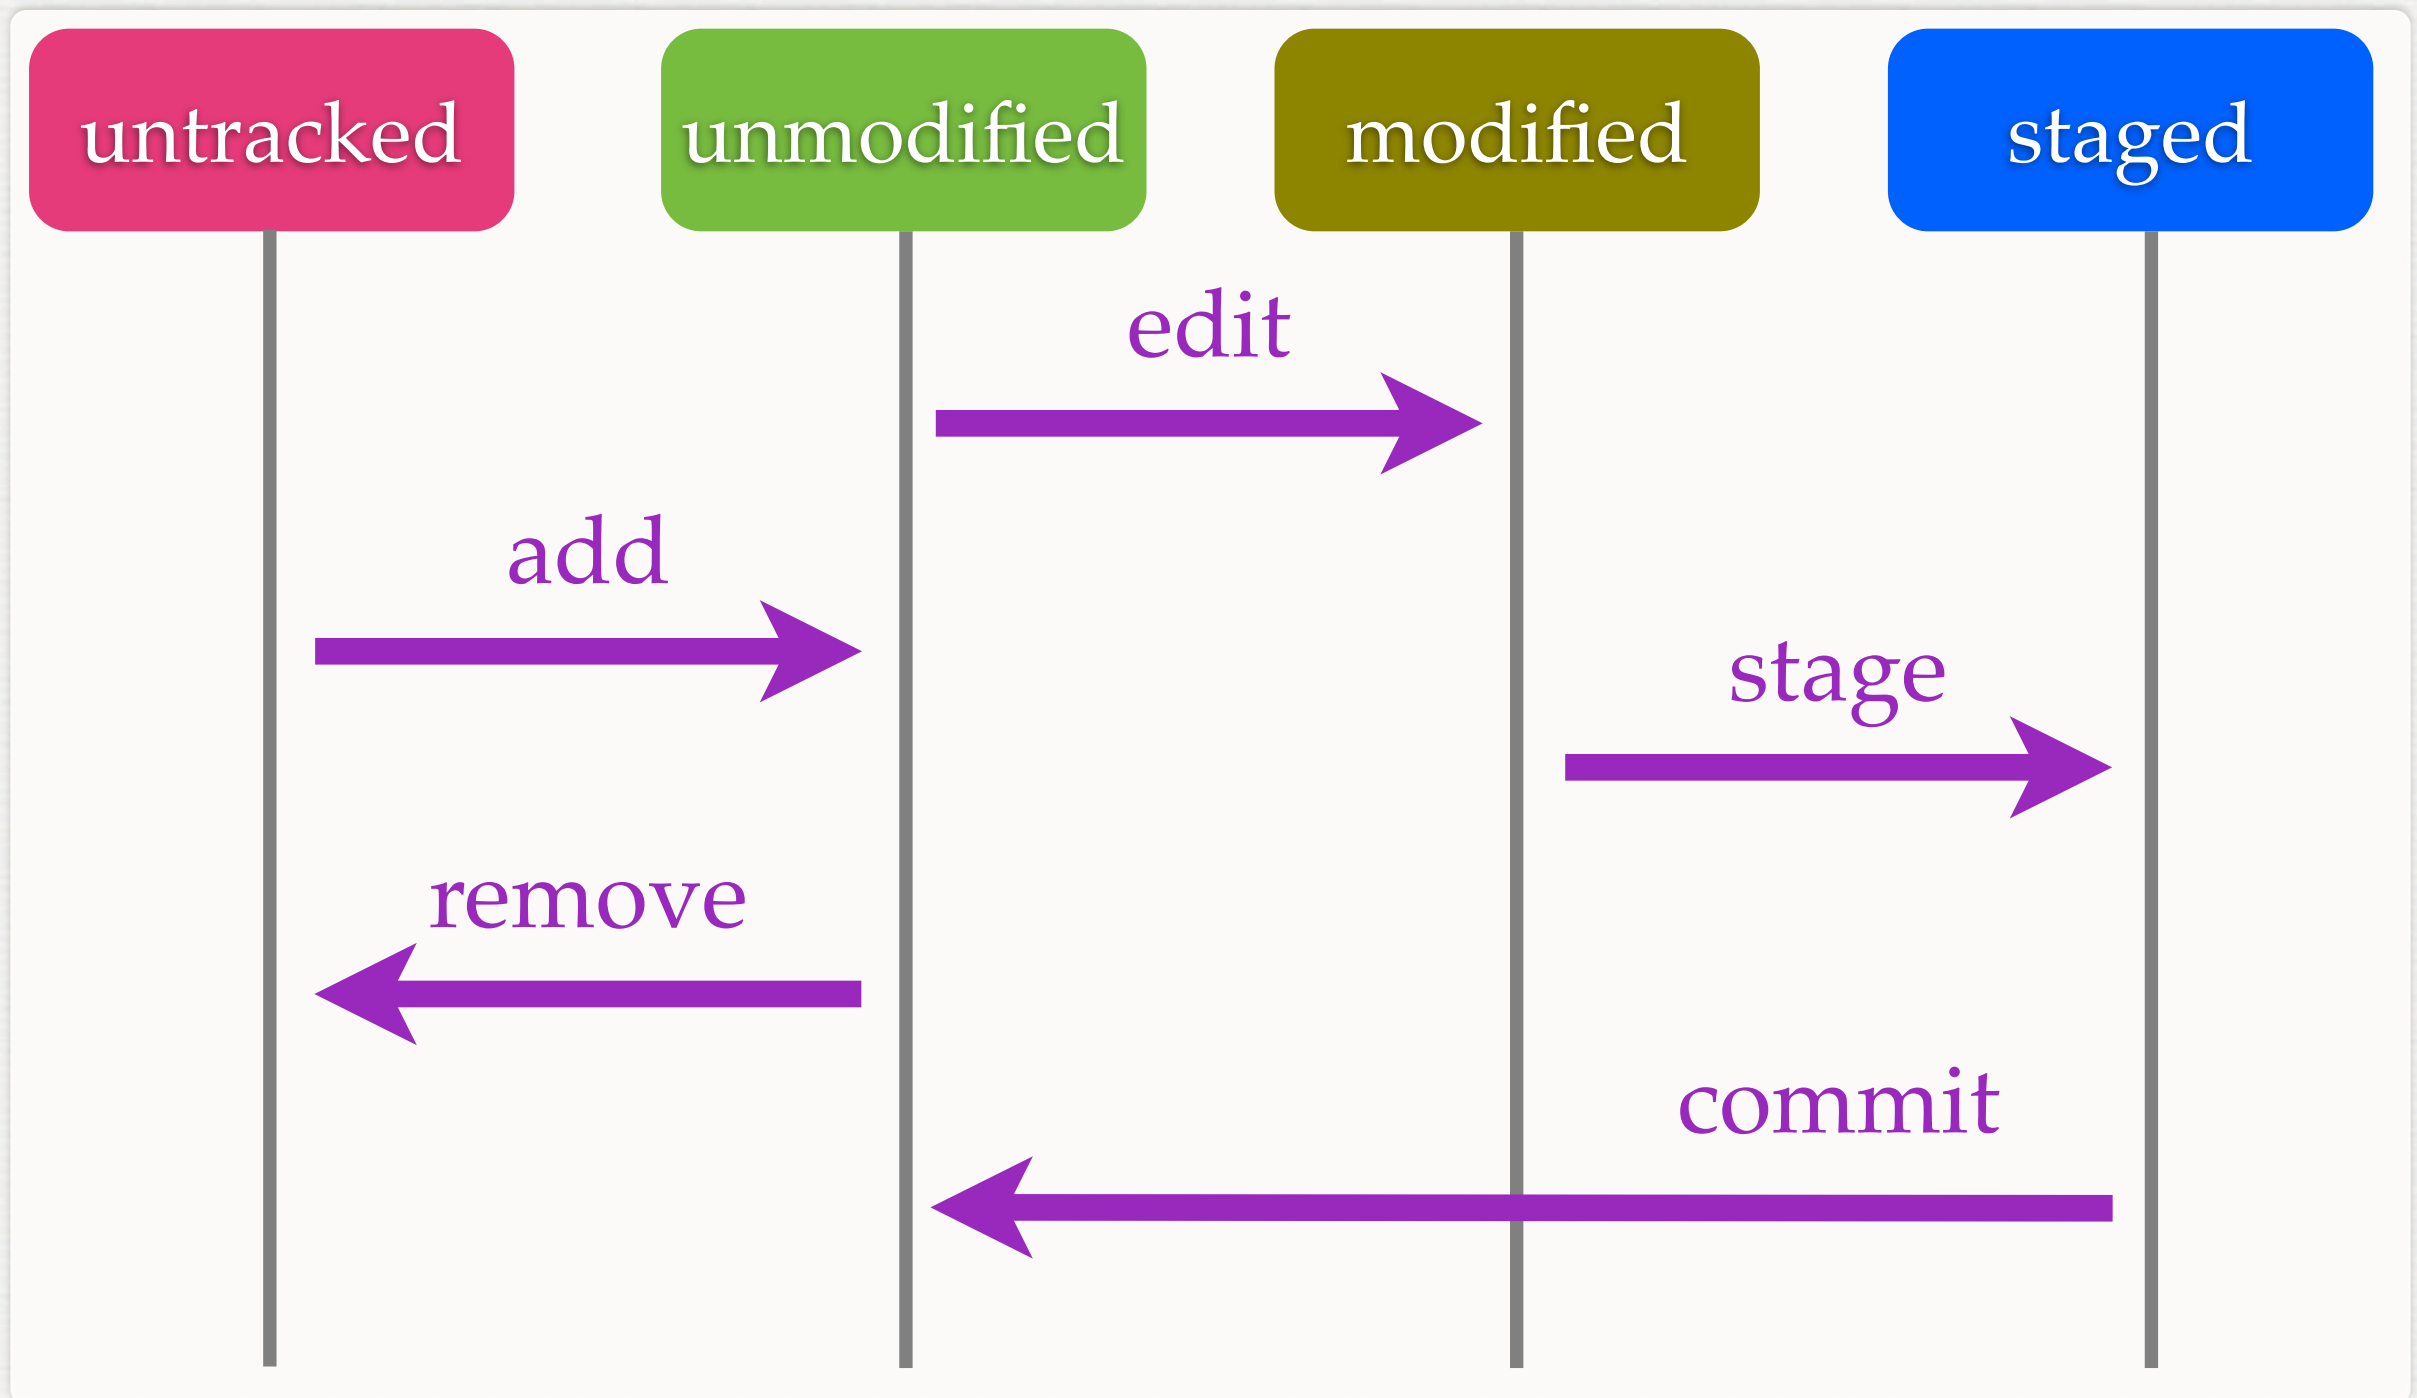

# PROJECT HOSTING

- GitHub (<http://github.com/>):
  - git
- Bitbucket (<http://gitbucket.org/>)
  - git, mercurial
- Google Code (<http://code.google.com/>)
  - svn
